Profile

Frontend Developer with hands-on experience building responsive and scalable web applications using React.js and modern UI technologies. Developed real-world projects including an e-commerce platform with cart and wishlist functionality. Strong understanding of UI/UX principles with a background in design, focused on creating clean, user-friendly interfaces. Seeking a frontend developer internship to contribute to impactful projects and enhance user experience through efficient code.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Framer Motion

State Management & Routing: Context API, useReducer, React Router

API Integration: REST APIs (Fetch, Axios), async/await, error handling

UI/UX: Responsive Design, Flexbox, CSS Grid, Dark/Light Mode

Tools & Platforms: Git, GitHub, Vite, npm, Vercel

Development Tools: VS Code, Chrome DevTools

Projects

Forever - Ecommerce Web Application

Tech Stack: React.js, Context API, Tailwind CSS

- Built a responsive web app supporting 50+ products with dynamic cart and wishlist updates.
- Implemented global state management using Context API for cart and wishlist operations
- Developed core features including add-to-cart, remove items, and dynamic quantity updates
- Designed and implemented order tracking page to monitor order status
- Created a user profile page to manage user-related information and navigation
- Ensured responsive design for seamless experience across mobile, tablet, and desktop devices
- Structured reusable components to maintain scalable and clean code architecture

Agency.ai – Responsive Landing Page

Tech Stack: React.js, Tailwind CSS, Framer Motion, Web3Forms

- Built a fully responsive landing page using React and Tailwind CSS
- Developed reusable components to maintain clean and scalable code structure
- Implemented dark/light theme toggle for improved user experience
- Integrated Web3Forms for handling contact form submissions
- Added animations using Framer Motion to enhance UI interactivity
- Optimized layout for mobile, tablet, and desktop screen sizes

Expense Tracker Web Application

Tech Stack: JavaScript, HTML, CSS

- Built a lightweight expense tracking application to manage daily income and expenses
- Implemented core CRUD operations and real-time total balance calculation.
- Used DOM manipulation to dynamically update the UI based on user input
- Designed a clean and responsive interface for better usability
- Structured code for efficient data handling and smooth user interactions

Professional Experience

2D Texture Artist

Tentrox Studios | March 2023 – Present

- Created high-quality digital assets with strong visual consistency
- Applied design principles like spacing, alignment, and color theory
- Developed strong UI/UX understanding applicable to frontend development
- Improved attention to detail in layout and visual composition

Education

Bachelor of Computer Applications (BCA)

06/2018 – 04/2021

Thiruvalluvar University, Tamil Nadu.

Languages

Tamil (Native)

English (Professional Working Proficiency)
