PERSONAL PROJECTS

Bug Solver

Built an AI-powered debugging web application that helps developers quickly identify, fix, and understand code errors with simple explanations and allows users to run the code to see the results. Developed using React, Tailwind CSS, Monaco Editor, Judge0, Google Gemini API, and Vercel Serverless Functions.

Forever (E-commerce)

Built an responsive e-commerce web application to enhance online shopping experience. It helps users easily browse 50+ products, filter and sort items by gender and price, manage carts, and complete purchases through an intuitive interface. Developed using React, Tailwind CSS and efficient state management for better performance and user interaction.

Expense Tracker

Built an web application to simplify personal finance management by helping users track income, expenses, and overall balance in one place. It enables users to easily add transactions and monitor spending history through a clean, responsive interface. Developed using HTML, CSS and Javascript.
