PROFESSIONAL SUMMARY

Frontend Developer with a focus on React.js and AI-integrated web applications. Built and deployed full-featured products including an AI-powered debugging tool using Google Gemini and Judge0 APIs, and a production-grade e-commerce application with advanced filtering and responsive design. Strong foundation in translating design intent into clean, performant UI backed by three years of professional experience in production-quality visual delivery. Looking to bring this combination of build skills and design sensibility to a product-driven engineering team.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

APIs & Integration: REST APIs, Google Gemini AI, Judge0 API, Vercel Serverless Functions

Tools & Platforms: Git, GitHub, VS Code, Vercel

Design & Visual: Figma, Affinity Photo, GIMP

PERSONAL PROJECTS

Bug Solver — AI-Powered Debugging Tool

Tech Stack: React.js, Tailwind CSS, Google Gemini AI, Judge0 API, Monaco Editor, Vercel

- Architected and shipped a frontend debugging web app that takes user-submitted code, detects bugs via Google Gemini AI, returns AI-generated fixes, and executes corrected code in real time using the Judge0 API reducing the typical debug-and-test loop to a single interface.
- Solved a key UX challenge by integrating Monaco Editor (VS Code's editor engine) to create a familiar, distraction-free coding environment inside the browser, improving usability for developer users.
- Deployed via Vercel Serverless Functions to handle API calls securely on the server side demonstrating awareness of client-side security and production deployment practices.

Forever — E-Commerce Web Application

Tech Stack: React.js, React Router DOM, Tailwind CSS

- Built a fully responsive, multi-page e-commerce application featuring a catalog of 50+ products with dynamic filtering by gender, category, and price range, implementing component-level state management to ensure seamless, flicker-free filter interactions.
- Designed and developed the complete UI from scratch with a focus on mobile-first responsiveness and cross-browser consistency, applying Tailwind utility classes to create a scalable, maintainable styling architecture.

EXPERIENCE

Tentrox Studios Pvt Ltd

03/2023 – Present | Tamil Nadu, India

Visual Production & UI Design Contributor

- Delivered 100+ production-ready visual assets under tight timelines, applying professional standards for colour theory, visual hierarchy, and pixel-level consistency, directly informing my approach to UI component design and frontend aesthetics.
- Reduced production rework cycles by 30% by implementing a structured QA review process, developing an eye for detail and error-prevention habits that translate directly to frontend code quality and design-system adherence.
- Worked cross-functionally with creative leads and project coordinators to deliver on brief, on time building the communication and workflow habits essential in agile development environments.

EDUCATION

Bachelor of Computer Applications

06/2018 – 04/2021 | Tamil Nadu, India

Sanghamam College of Arts and Science

Scored - 77%
